

# Insu 10Dx Plus

Designed for demanding power utility environments with high induction fields, this tester ensures exceptional performance and accuracy. Its advanced noise immunity and user-selectable digital filters provide stable readings, while multiple test voltage options make it a versatile and reliable choice for field engineers.

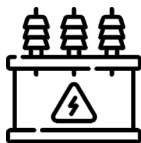

## Key Features

- Test voltage: 100-1000 V (10 V steps), 1000-10000 V (25 V steps)
- Insulation resistance up to 20 TΩ
- User-selectable digital filters
- Noise rejection up to 8 mA
- Bluetooth connectivity & data logging
- Touchscreen TFT color display
- Audio read-out of test results
- 3 programmable timers
- PI, DAR, DD, Step Voltage & Ramp Test

## Applications

**Motors & Generators**

**Transformers**

**Preventive Maintenance**

**Aerospace & Defence**

**Railways**
