

3-Phase Current Transformer- Omega 3PH Series

Reliable Measurement for Three-Phase
Electrical Systems

Enhance your power monitoring and energy management systems with high-performance 3-phase current transformers designed to deliver accuracy, safety and efficiency in a compact footprint.

Features

- **Three-in-One Design** - Integrated 3 individual CTs in a single body
- **Connections**-Dual-access self-lifting screw terminals for easy connection on either sides
- **Wide Range** - Primary current: 5A to 800A | Secondary: 1A or 5A
- **Safe & Compact** - Polycarbonate housing, Non-drip, Self-extinguishing & flame retardant classified to UL 94 V-0
- **High Accuracy** - Class 0.5 / 1.0 / 3.0
- **Flexible Mounting** - Busbar, cable, DIN-rail or Wall installation, easy fit with MCCBs.

Application

**Power & Energy
Monitoring**

**Electrical
Panels**

**Utility
Metering**

**Industrial
Automation**
